shamrock

felt

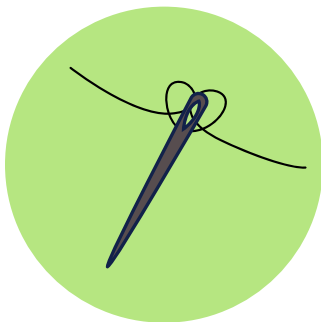

to cut

square

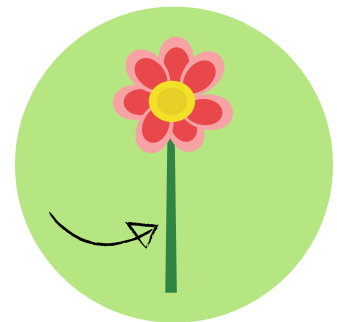

shape

to thread a
needle

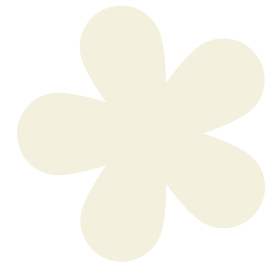

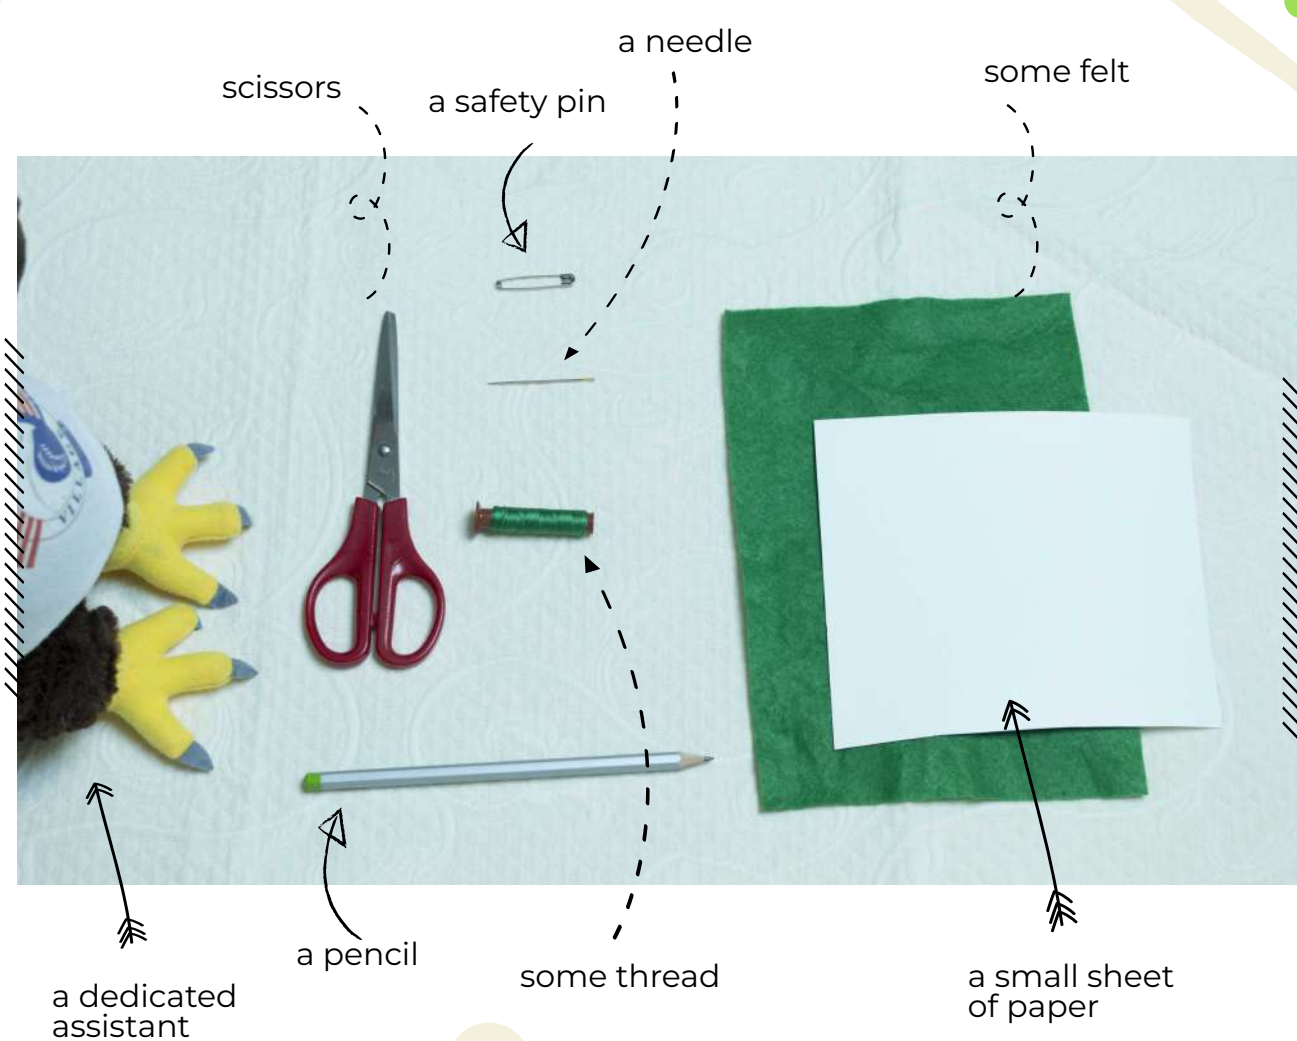

knot

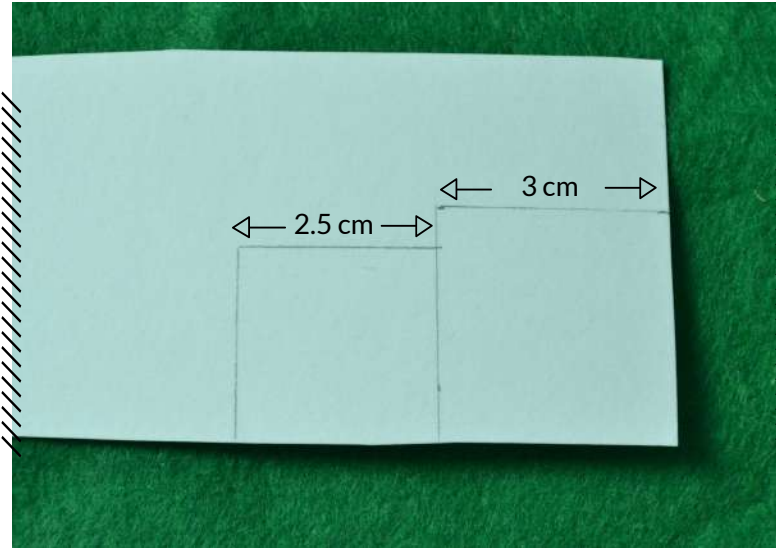

stem

Let's get it started!

You need:

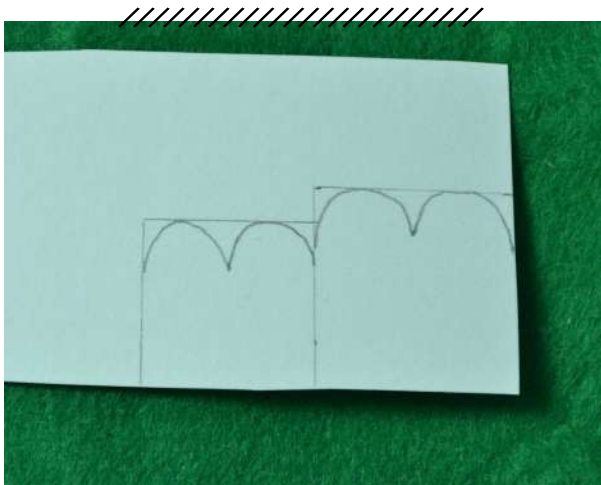

Step 1: Draw the shapes

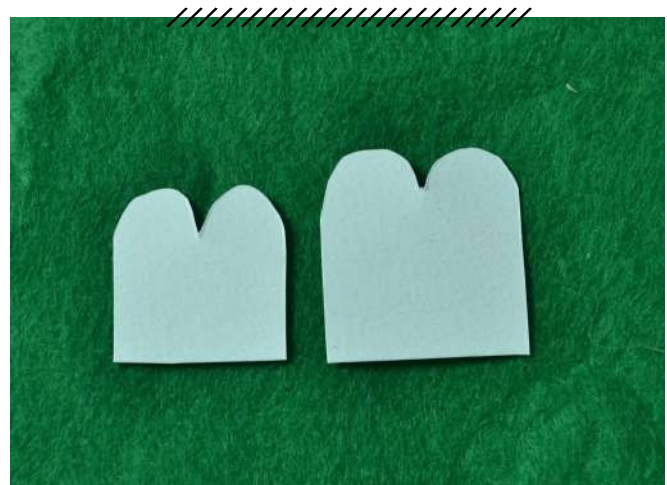

Draw 2 squares on the white paper sheet.

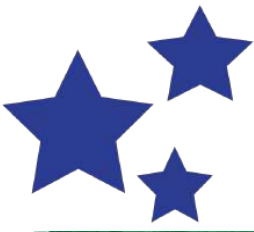

Step 2: Cut the template

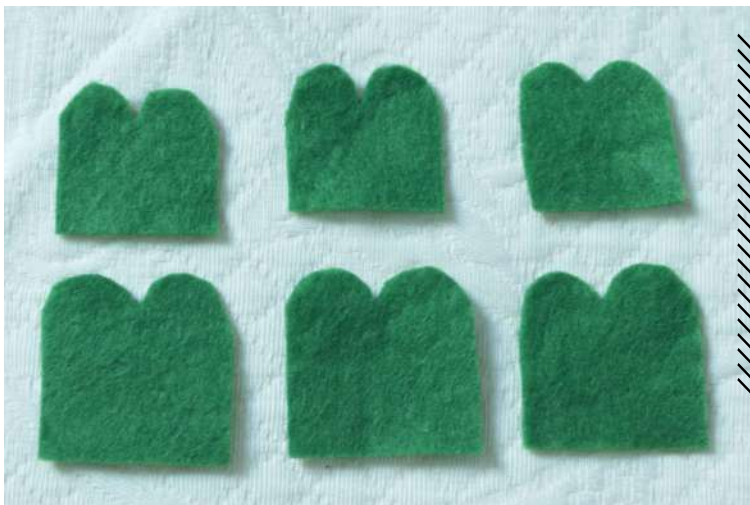

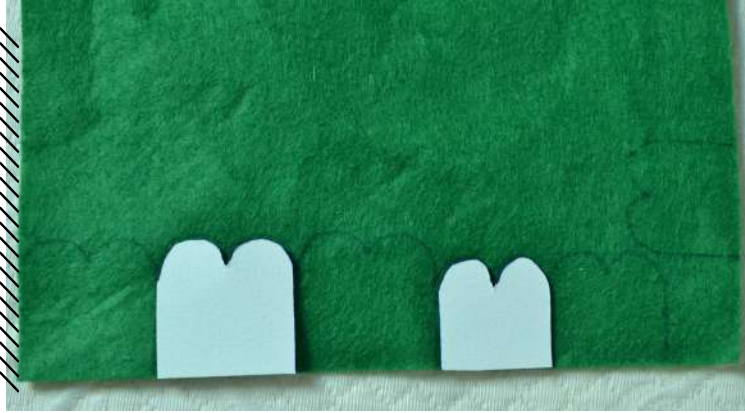

Then draw 2 half-circles in the square (like the top part of a heart).

Then cut out the 2 shapes.

Step 3: Cut out the leaves

Using the shapes as a model, draw 3 big leaves and 3 small leaves on the green felt, then cut them out.

Step 4: Pair the leaves

Pair each large leaf with a smaller one by placing a small one on top of a big one.

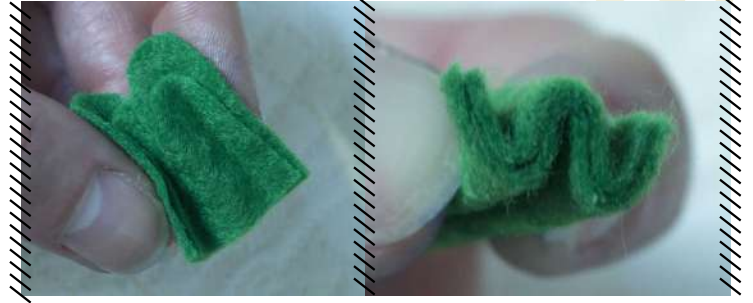

Step 5: Fold the leaves

Thread the needle.

By using your thumb and forefinger, fold the set of 2 leaves to make a "weave".

Step 6: Attach the leaves

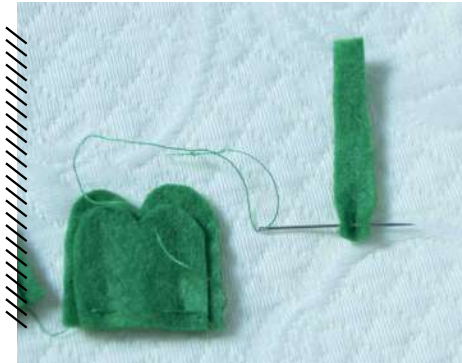

Sink the needle through the felt "weave".

And repeat with the other leaves.

Step 7: Add the stem

Add a stem made of a small rectangle of felt.

Step 8: Create the shamrock

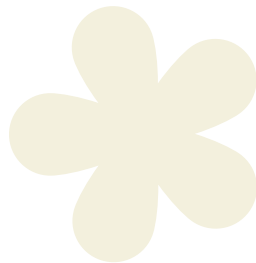

Place the leaves in a circle and pull the tread to contract the circle. Knot the thread.

You can sew a safety pin on the back of your shamrock if you want to pin it on your clothes.

There you go!
